

Roller Mowers

Winged, Three Point Linkage

Models in this range: MJ71-340, MJ71-400, MJ71-540

Units for wide area mowing that deliver a high work rate but doesn't compromise on the quality of cut, to give that all important after-cut appearance. A 2½" blade overlap and a custom designed gearbox, together with a high blade tip speed means a professional striped effect is easily achieved.

These units are built using Strenx™ 700 MC high-strength steel and hot-dip galvanized to EN ISO 1461:2009. Galvanization not only extends the life

span, but also reduces maintenance and enhances the trade-in value of your investment. Transportation is easy with the wings folded. The 75" transport width allows for easy access with wing lock for safe road transportation. There is an LED road lighting kit available for safer use on public highways.

- ✓ 75" transport width for easy access with wing lock for safe road transportation
- ✓ Walterscheid PTO drive shafts fitted as standard
- ✓ Sits tight behind the tractor making towing easy and allows tighter turning circles
- ✓ Bodies are produced from Strenx™ 700 MC high-strength steel and hot-dip galvanized to EN ISO 1461:2009.
- ✓ The overall weight of the machine is lighter than equivalent width mowers on the market, without compromising on build quality - hot-dip galvanized body extends the life span of the mower

“ We have used other mowers in the past, however the finish given by the Major MJ71-540 Swift was far superior to any other machine. We can cover over 15 acres an hour. The quality of cut is excellent and it's a very reliable mower. ”

Gordon McMurdo, Director at Albar Turf

Product specifications			
Model	MJ71-340	MJ71-400	MJ71-540
Overall Width	137" (3.48m)	163" (4.16m)	218" (5.54m)
Working Width	134" (3.40m)	157" (4.00m)	213" (5.40m)
